

Forensic Assessment of sex offenders

Course Aims

To look at the nature and diversity of adult sexual offending, and the risks it poses for families and the community.

Objectives

By the end of the course, participants will:

- Be able to identify and manage risks relating to sexual offences
- Understand the nature and diversity of sexual offending
- Be aware of current research and practice in offending, and the management of sex offenders
- Know how to manage risks in families where a sex offender is present
